

1. Put a tick for the topics mentioned.

scientists (___)	astronauts (___)	spacewalks (___)
satellites (___)	agreements (___)	junk collectors (___)
space travel (___)	suggestions (___)	solar system (___)
rockets (___)	space ships (___)	damage (___)

2. Circle T (true), F (false), or NM (not mentioned).

- a) Scientists think space junk will fall to Earth and kill thousands. T / F / NM
- b) Space junk is a serious threat to the International Space Station (ISS). T / F / NM
- c) There are 22,000 small objects in space which are too small to follow. T / F / NM
- d) ISS and NASA spend millions of dollars every year cleaning up space junk. T / F / NM
- e) Scientists believe that we still have a lot of time to clean up space junk. T / F / NM
- f) Space agencies have never agreed on a plan to keep space clean. T / F / NM
- g) After China blew up a satellite, they stopped doing missile tests. T / F / NM
- h) The amount of junk in space has increased during the last few years. T / F / NM
- i) Magnets and nets might be used to clean up space. T / F / NM

3. Answer the question.

How do you think this problem can be solved?
