

Mark T (for True), F (for False) or DS (for Doesn't Say)

1. Learning a new language during deep sleep is a myth.
2. Unlike many people think, our brain is active during the time we sleep.
3. Our brain is active during “down-state”.
4. Most of the people tested reported they could learn a second language more easily.
5. The existing research is not enough to make a definite conclusion.
